FAQ

Pre-Installation Check Installation should be performed using a system memory of 2GB (trust me - otherwise you will fail).. Upgrade of memory can take place after you have installed the system Also the BIOS should be set to default settings prior to OS installation.. After many failed attempts to create an USB installation media using OS X 10 5 x, i decided to do a Windows-only approach.

Open Transmac Right click on the flash drive and select 'Format with Disk Image'.. My guide will show you how to install OS X Snow Leopard 10 6 4 on an ASUS 1201n without using a Mac or a buggy Vmware machine.. You will need An image (iso or dmg) of a retail OS X 10 6 0 DVD Transmac (14-days trial) My slightly patched Notebookinstaller 0.. You will probably see an icon that reads 'Windows NTFS' and one that says 'MAC OS Install DVD'.. Now select the Snow Leopard Retail image If its a dmg file be sure its not compressed (you can expand it with the same software). [??????](#)

Eee Pc Asus 1201nAsus 1201n Drivers Windows 10Tutorial: Install Mac OS X Snow Leopard on ASUS 1201n without a Mac..
Step 3Now attach both flash drives to the usb ports of the 1201N Make sure you have resetted the BIOS to the Default Settings..
You should see both USB drives in the list If not, reboot and repeat until both drives are recognized.. Turn on the Netbook and
press 'ESC' at the bios screen to manually choose boot medium.. Transmac will write the image to your flash drive This takes
about 40 minutes Step 2Once the writing process is finished, remove the flash drive and insert the small one.. To my surprise,
this was a straight winner!I have to give credits to the excellent guide from mosslack, which this method partly relies on.. Now
repeat the process, this time using NBI_0 8 4RC1 img (extracted from the rar file).. 6 4 Combo Update Large USB flash drive
with at least 8GBSmall USB flash drive with at least 128MBStep by Step GuideStep 1Attach your flash drive (>= 8GB) to your
PC.. The only hardware requirement is a PC with Windows XP, Vista, or 7 and two flash drives. ae05505a44 [2003 Terminal
